## **MEDIA RELEASE**

**DATE** : August 16, 2017

**RE** : The consumers of Prepaid Electricity in North West 405 now have alternate channels available to buy Prepaid Electricity

With effect from August 1 2017, the municipality has made available a wide variety of channels through which residents can buy prepaid electricity. This is the municipality's attempt to bring the service closer to the people.

Council has entered into a service level agreement with Utilities World to sell electricity to consumers through several channels including the internet via [www.prepaid24.co.za](http://www.prepaid24.co.za), all major banks (ABSA, FNB, Standard Bank, and Nedbank), and a number of new vending stations, in addition to some of the existing sites. The municipality has held meetings with the vendors explaining the new requirements of the municipality with regards to the expanding vending footprint and enhancing accessibility for consumers.

Utilities World will require municipal approval for the allocation of new vending stations and the municipality will still oversee the entire process.

Meanwhile the Council's Credit Control Policy (95/5 split), whereby the municipality recovers 95% of arrears outstanding from any amount used to purchase electricity is still in operation. The system has been in operation for some time in Potchefstroom and has now been extended to include Ventersdorp. There have been some initial system challenges during the introduction of these changes – however, all the problems are being addressed and resolved.

Council appeals to all consumers whose prepaid meter is not linked to their municipal account, to please approach any municipal office / rates hall with a copy of their identity document to rectify this problem. Customers will not be able to purchase prepaid electricity until this is rectified by the consumer.

Customers who are in arrears are also requested to approach the municipality to make arrangements for paying off their bills.
