## MEDIA RELEASE

**DATE** : August 16, 2017

**RE** : Public gets more platforms from which to buy electricity

With effect from August 1 the municipality has made available a wide variety of platforms through which residents can buy electricity. This is the municipality's attempt to bring the service closer to the people.

Council has entered into a service level agreement with Utility to sell electricity to consumers through several channels including the internet, prepaid 24 and a number of new vending stations apart from those that has been in operation. The municipality has held meetings with these vendors to explain the new regime.

Henceforth Utility will first have to secure municipality approval for the allocation of new vending stations and the latter will still oversee this process.

Meanwhile the Council's 95 / 5 electricity supply system, whereby the municipality recovers 95% arrears from any amount used to purchase electricity is still in operation. The system has been in operation for some time in Potchefstroom and has now been extended to Ventersdorp. There has been some teething problems in introducing the system in Ventersdorp but the problems are being overcome.

Council has also made an appeal to all consumers whose meters are not linked to the municipality to approach any rate hall with copies of their identity documents to have them linked up to the system. The process Consumers will not be able to have the electricity supplied to them if they are not linked.

The following are the newly allocated vending stations:
